CAREER OBJECTIVE

Computer Science and Engineering final-year student with hands-on experience in **full-stack development, cloud infrastructure, and AI-driven applications**. Skilled in **Python, Django, React, AWS, Docker, and REST APIs**, seeking a **Software Engineer or DevOps Engineer** role to build scalable software and cloud-native solutions.

SKILLS

Programming Languages	: Python, Java
Backend	: Django, Django REST Framework, Flask, REST APIs
Frontend	: React (Vite), JavaScript, HTML, CSS, Tailwind CSS
Cloud & DevOps	: AWS (EC2, S3, IAM, VPC, Lambda, AWS CLI, CloudFormation), Docker, Nginx, Linux, Bash
Databases	: MySQL, SQLite
AI/ML	: Machine TensorFlow, OpenCV, NLP, Machine Learning
Tools and Platforms	: Git, GitHub, GitLab, Cloudflare, VS Code
Core CS	: Data Structures, Computer Networks, DBMS, Object-Oriented Programming, Operating Systems
Soft Skills	: Problem Solving, Communication, Collaboration, Ownership

PROJECTS

HireFlow – Intelligent Talent Assessment Platform [\[GitHub\]](#) | Jan 2026 – Mar 2026

Tech: Django REST Framework, React, MySQL, JWT, GitHub API

- Built a full-stack hiring platform solving three real-world recruitment problems: **detecting fraudulent job postings, verifying technical skills, and identifying high-potential freshers**.
- Designed **Trust Score** and **Potential Score** engines using fraud indicators and candidate portfolios to improve hiring decisions. Developed a **GitHub-integrated verification engine** that validates technical skills through repository analysis, including technology usage.

CloudScale-High-Availability Web Infrastructure (Team of 2) [\[GitHub\]](#) | Mar 2026 – Apr 2026

Tech: AWS (VPC, EC2, ALB, Auto Scaling, Bastion Host), Nginx, React, Linux

- Designed and deployed a **highly available AWS infrastructure** that **eliminates single points of failure** using private subnets, Application Load Balancer, and Auto Scaling. Implemented a **secure network architecture** with Bastion Host-based administration and security groups, preventing direct public access to application servers.
- Deployed a React application with Nginx across private EC2 instances, **enabling scalable, fault-tolerant, and production-style web hosting**.

Agro-Optics – AI Agricultural Decision Support Platform (Team of 4) [\[GitHub\]](#) | Nov 2025 – Feb 2026

Tech: Python, TensorFlow, Flask, React, SQLite, OpenCV

- Built a full-stack AI platform that addresses key agricultural challenges by **identifying soil type, estimating soil nutrients, detecting plant diseases, and recommending suitable crops** from image-based analysis.
- Developed CNN-based models and integrated weather data to generate data-driven farming recommendations, **reducing dependence on manual field assessment and laboratory soil testing**.
- Designed REST APIs and a prediction pipeline for real-time inference, **enabling end-to-end diagnosis from image upload to crop recommendation**.

EDUCATION

B.E. in Computer Science Engineering, Jain College of Engineering, Belagavi VTU CGPA: 9.1/10	2023-2027
PUC, Karnataka Board Govindram Seskarian Science Pre-University College, Belagavi Marks: 95.5%	2021-2023
SSLC, KSEEB Swadhyaya Vidhya Mandhir High School, Belagavi Marks: 98.08%	2021

CERTIFICATIONS

Python for Data Science – NPTEL (Top 2%) - IIT Madras, Full Stack Development – Udemy

ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES

- Hackathon Finalist**, ADCET National Level Hackathon (2025) – **AI-powered Descriptive Answer Evaluation System**.
- Winner**, Inter-College Ideathon – **NeuroScopeAI**, AI-powered multimodal Parkinson's disease detection system.
- Member**, IEEE Student Chapter & Innovation Hub, Jain College of Engineering (2024–Present).
